

MOHAMADHU ASHIK S

FULL STACK DEVELOPER

Madurai, Tamil Nadu | +91 7092136152 | mohamadhuashik@gmail.com | linkedin.com/in/mohamadhuashik

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building and maintaining web applications using React.js, Next.js, Node.js, and Express.js. Experienced in developing REST APIs, contributing to microservices-based architectures, and integrating third-party services including social media platforms and payment gateways (Razorpay, Paytm, Paynimo, Stripe). Skilled in end-to-end feature delivery, from admin tooling and user management systems to customer-facing applications, with hands-on experience migrating React.js applications to Next.js for SEO and performance gains.

EXPERIENCE

Full Stack Developer — Dot Com Infoway

Sep 2025 – Aug 2026

- Contributed to Alfred, an AI-powered social media agent, building REST APIs, user management, and an Admin Panel within a Node.js/Python microservices architecture.
- Migrated a client's sponsorship platform from React.js to Next.js and integrated Razorpay, Paytm, and Paynimo payment gateways.
- Collaborated across frontend and backend teams to deliver end-to-end features, fix production issues, and support live deployments.

Full Stack Developer — Wizinoa Pvt Ltd

Dec 2024 – Aug 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Designed and developed Dreamswed, an end-to-end wedding planner booking platform with vendor and user booking workflows.
- Built a multi-role system with a City Manager approval workflow and an Admin module for platform oversight.

Full Stack Developer — Shiv Technologies

Feb 2024 – Nov 2024

Tech Stack: React.js, Node.js, Express.js, MongoDB, Stripe, NodeMailer, Cron Jobs

- Developed Tradedge, a trading analytics platform unifying MT4/MT5 data with a real-time dashboard and Playbook feature.
- Integrated Stripe for payments and NodeMailer for automated notifications, with cron jobs powering scheduled reports.

PROJECTS

Alfred — Social Media Agent (Simbli AI Platform)

Tech Stack: React.js, Node.js, Python (microservices), REST APIs, MySQL

- Contributed to Alfred, an AI-powered social media agent within Simbli's microservices-based platform, enabling users to connect social accounts and create, publish, or schedule content.
- Built user management features (registration, login, email functionality, account deletion) and a dedicated Admin Panel using React.js and Node.js for managing users and subscriptions.
- Integrated Zernio, a third-party service connecting users' social media accounts to Alfred, supporting content publishing and scheduling functionality.
- Designed and maintained REST APIs and backend services, primarily on the Node.js side of a Node.js/Python microservices architecture.

Client Project — Sponsorship & Donation Platform

Tech Stack: React.js, Next.js, Node.js, Express.js, MySQL, Razorpay, Paytm, Paynimo

- Built the platform on a fully CMS-driven architecture, with all page content, from top to bottom, managed through a CMS and served via the Node.js backend.
- Migrated the application from React.js to Next.js and implemented Server-Side Rendering (SSR) for public-facing pages across a 50+ page site to improve SEO and performance.
- Integrated Razorpay, Paytm, and Paynimo payment gateways to enable secure monthly child sponsorship and donation contributions.
- Developed and integrated REST APIs using Node.js and Express.js to support platform features.

Dreamswed — Wedding Planner Booking Platform (dreamswed.com)

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Designed and developed an end-to-end platform, including database schema design, authentication, and APIs, enabling users to search, book, and pay for wedding services such as venues, photographers, makeup artists, and catering.
- Built a multi-role system allowing users to search, book, and contact vendors directly, and vendors to sign up, choose a subscription plan, and list services.
- Implemented an approval workflow where vendor-added services are reviewed and approved by City Managers before being published.
- Built an Admin module to create City Managers and monitor vendor activity across the platform.

Tradedge — Trading Analytics & Playbook Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, Stripe, NodeMailer, Cron Jobs

- Developed an end-to-end web application, including schema design, authentication, and APIs, to unify and analyze trading data from MT4 and MT5 platforms.
- Built a Playbook section offering trading strategies and risk management techniques to help users refine their skills.
- Implemented a private/public visibility toggle per account, giving users control over trading data and profile privacy.
- Integrated Stripe for payment processing and NodeMailer for automated email notifications on trading activity.
- Built a real-time analytics dashboard and used cron jobs to automate routine data updates and scheduled reports.

Shoppers — E-commerce Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built detailed product listing pages with descriptions, images, and pricing.
- Implemented cart functionality and a secure, streamlined checkout process.
- Enabled user account creation with order tracking and profile/preference management.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI

Backend: Node.js, Express.js, REST API Development

Databases: MongoDB, MySQL

Architecture & Integration: Microservices, Third-Party API Integration, Social Media API Integration, Payment Gateway Integration (Razorpay, Paytm, Paynimo, Stripe)

DevOps & Tools: Nginx, Git, GitHub, Postman, VS Code

EDUCATION

Bachelor of Engineering — PTR College of Engineering and Technology

2018 – 2022

CGPA: 8.83

CERTIFICATION

Full Stack Development — Ace Software Training Academy
